

Why does my map dashlet always show Kansas?

Link: <https://help.gpsinsight.com/deep-dive/why-does-my-map-dashlet-always-show-kansas/> Last Updated: May 23rd, 2016

QUESTION:

Every time I log into my portal account, why is my **map dashlet** always centered on the state of Kansas? My company is nowhere near Kansas.

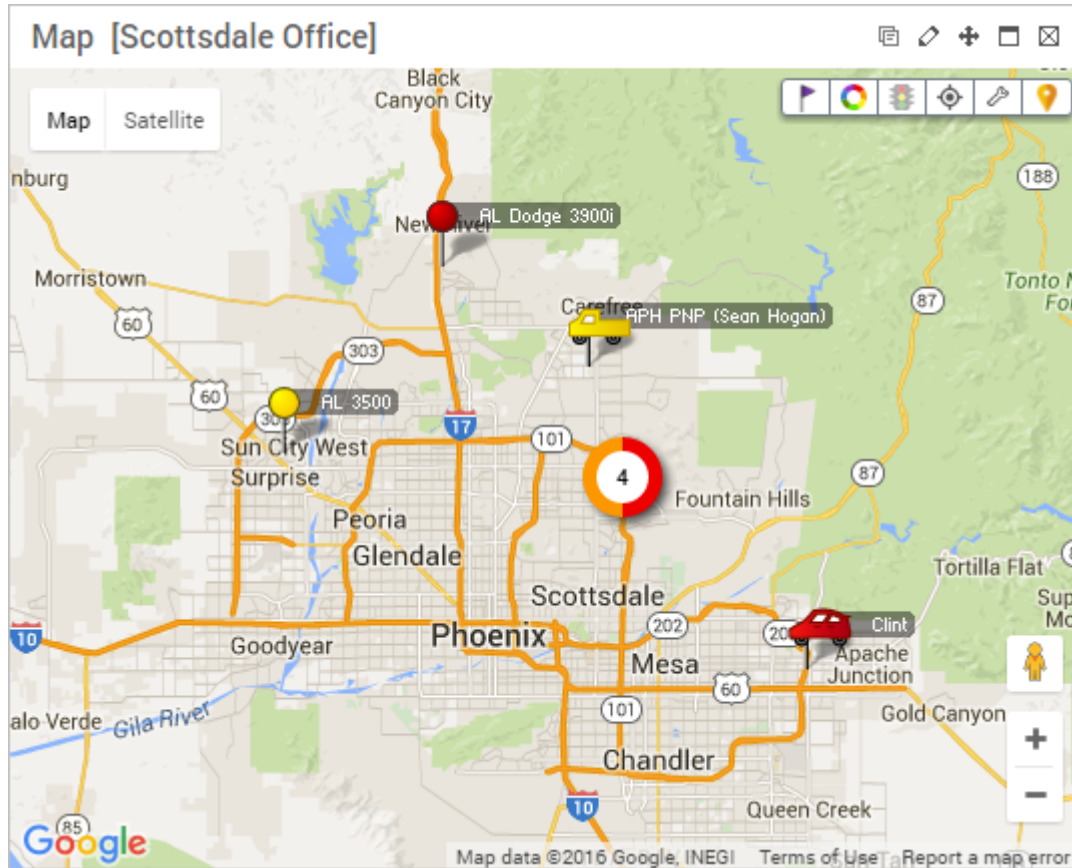

The default location of the **map dashlet** is the geographical center of the contiguous United States.

As soon as you have vehicles **installed and registered** in your account, the map automatically centers around the vehicles/group to which you have **access** and/or around a specific vehicle group specified in the **dashlet map's settings**.

Why does my map dashlet always show Kansas?

Toto, I've a feeling we're not in Kansas anymore.

If you don't see any vehicles on the map (i.e., you only see Kansas), contact your company's GPS administrator to ensure **you have been given access** to view them.
