Device Script Updates 2/12/2021

The following device scripts have been updated with new features.

GPSI-5000 Inputs

- Seatbelt (5000) – Input 3

- Seatbelt (5000) – Input 4

  – Added support to report seatbelt buckled/unbuckled status from hardwired seatbelt monitoring kits.
  – Seatbelt reporting/alerting is still in beta testing, and not available for everyone. Please coordinate with your Account Rep if interested.
