SMS Messaging allows you to send SMS messages from within the portal and/or from your mobile device. You (and your drivers) can explore additional [query services](#) for more advanced functions performed from an SMS-enabled device—such as getting a vehicle’s current location, setting landmarks, adding stop notes, and more.

Note. In order to use Messaging, you must have the Messaging permission enabled in the [User Access List](#), the SMS Messaging and SMS/Email items enabled in the [Menu Access List](#) (Custom and Dashlet categories). You will only see messages associated with [vehicles](#) and/or [drivers](#) that are available to you.

SMS Messaging
Refresh

Compose

Send messages directly to [current driver](#) or the [contact info](#) for the vehicle.

Vehicles: -select [show drivers](#)

Message:
