

The Fleetio integration pushes your DTC, odometer/runtime, secondary meter, and vehicle location data from GPS Insight to **Fleetio**. This integration automatically captures telematics data, making it easier to keep up with preventive maintenance and respond quickly to vehicle issues from Fleetio.

The screenshot shows the Fleetio interface for a vehicle named 'LE-4'. At the top, there is a search bar labeled 'Search Fleetio' and a dropdown menu set to 'All'. Below the search bar, the vehicle profile for 'LE-4' is displayed. It includes a small image of a 2015 Dodge Charger, the text 'Car · 2015 Dodge Charger · 1GNLC2KCSF8628848 · 2477658', and two metrics: '125,432.8 mi' and '1,324 hr'. The vehicle is marked as 'Active' with a green dot and is categorized as 'Law Enforcement'. The user 'Jason Davis' is associated with the vehicle. There is an 'Edit Labels' button. Below the profile, a map titled 'Last Known Location' shows the vehicle's position in the 'LAKESIDE' area, near 'W 71st St' and 'Lafayette Rd'. The map includes street names like 'Lakeside Dr', 'Bluffridge Way', 'Marsh Rd', 'Digital Way', and 'Network Way'. Landmarks like 'Social Security Administration' and 'HUNTINGTON COMMUNITIES' are also visible. The map is credited to Google and shows data from 2023. At the bottom of the map, it says 'Idle' and '5 days ago'.

Integration Benefits

- Manage preventive maintenance and diagnostics trouble codes within Fleetio from the GPS Insight integration
- Automatically view odometer readings and secondary meter runtime data for any vehicle with an additional meter within Fleetio

Note. PTO data is not available.

- View asset location, driving status, and more in the vehicle profile screen

Configuring the Integration

Note. The below instructions are for Enterprise customers only. Standard customers must contact

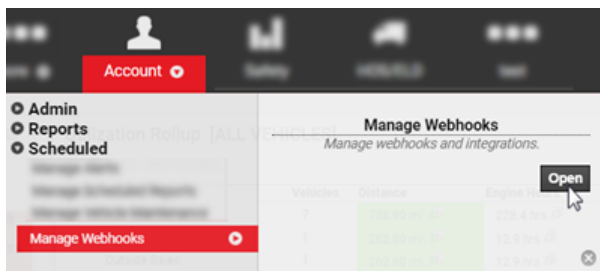

their Account Managers to configure this integration.

Use the below instructions to set up the Fleetio integration.

Note. Before starting, ensure the vehicles' VINs in the GPS portal matches the VINs in the Fleetio system. Additionally, you must generate a new API token from the Fleetio system (from the Fleetio main menu > **API Keys**).

1. From the Classic Portal, click the **Account** menu, click **Manage Webhooks**, and click **Open**.

The Webhook Manager opens in a new browser tab.

2. Under Available Integrations, click the green plus sign (+) next to **Fleetio**.

The Fleetio integration window appears.

3. Enter the required properties for the integration:

- **API Key:** Enter **API key** provided by Fleetio.
- **Account Id:** Enter Account Id provided by Fleetio.
- **Update Location:** Select the box to integrate location updates (optional).
- **Update Odometer:** Select the box to integrate odometer updates (optional).
- **Update Secondary Meter:** Select the Runtime option to integrate secondary meter updates (optional).
- **Diagnostic Trouble Codes:** Select the box to integrate DTCs (optional).

4. Click **Add**.

The third party integration(s) are assigned an ID and appears in the 3rd Party Integrations grid. There will be a separate ID for each integration type (e.g., Fleetio Odometer, Fleetio DTC, etc.). Additional information is provided for Status and Queue Depth. An option to delete the integration(s) is also available.

3rd Party Integrations
