

The Fleetio integration pushes your DTC, odometer/runtime, secondary meter, and vehicle location data from GPS Insight to **Fleetio**. This integration automatically captures telematics data, making it easier to keep up with preventive maintenance and respond quickly to vehicle issues from Fleetio.

The screenshot displays the Fleetio interface for a vehicle named 'LE-4'. At the top, there is a search bar with the text 'Search Fleetio' and a dropdown menu set to 'All'. Below the search bar, a navigation arrow points to 'Vehicles'. The vehicle profile for 'LE-4' is shown, featuring a small image of a white Dodge Charger with 'POLICE' and '12' markings. The vehicle details include: 'Car · 2015 Dodge Charger · 1GNL2KCSF8628848 · J477658', '125,432.8 mi', '1,324 hr', a green dot indicating 'Active' status, 'Law Enforcement' as the user type, and the name 'Jason Davis'. An 'Edit Labels' button is visible. Below the profile, a map titled 'Last Known Location' shows the vehicle's position in Huntington Communities, near W 71st St and Lakeside Dr. The map includes street names like Lakeside Dr, W 71st St, Lafayette Rd, Bluffridge Blvd, Bluffridge Way, Social Security Administration, Network Way, Digital Way, Marsh Rd, and Telecor. The vehicle is marked with an orange dot. The map interface includes 'Map' and 'Satellite' tabs, zoom controls, and a 'Google' logo. At the bottom of the map, it says 'Idle' and '5 days ago'.

## Integration Benefits

- Manage preventive maintenance and diagnostics trouble codes within Fleetio from the GPS Insight integration
- Automatically view odometer readings and secondary meter runtime data for any vehicle with an additional meter within Fleetio

**Note.** PTO data is not available.

- View asset location, driving status, and more in the vehicle profile screen

## Configuring the Integration

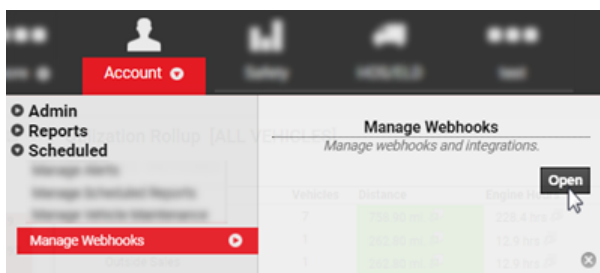

**Note.** The below instructions are for Enterprise customers only. Standard customers must contact

their Account Managers to configure this integration.

Use the below instructions to set up the Fleetio integration.

**Note.** Before starting, ensure the vehicles' VINs in the GPS portal matches the VINs in the Fleetio system. Additionally, you must generate a new API token from the Fleetio system (from the Fleetio main menu > **API Keys**).

1. From the Classic Portal, click the **Account** menu, click **Manage Webhooks**, and click **Open**.

The Webhook Manager opens in a new browser tab.

2. Under Available Integrations, click the green plus sign (+) next to **Fleetio**.

The Fleetio integration window appears.

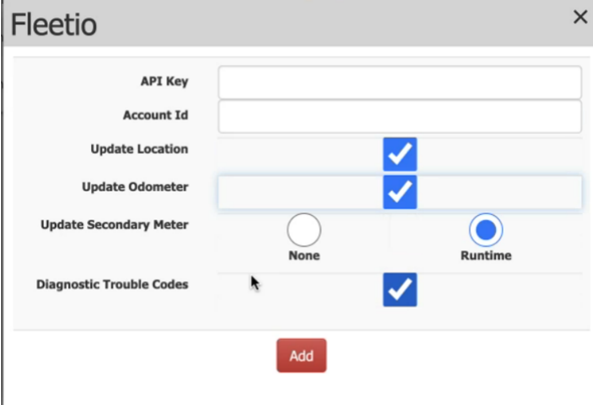

3. Enter the required properties for the integration:

- **API Key:** Enter API key provided by Fleetio.
- **Account Id:** Enter Account Id provided by Fleetio.
- **Update Location:** Select the box to integrate location updates (optional).
- **Update Odometer:** Select the box to integrate odometer updates (optional).
- **Update Secondary Meter:** Select the Runtime option to integrate secondary meter updates (optional).
- **Diagnostic Trouble Codes:** Select the box to integrate DTCs (optional).

4. Click **Add**.

The third party integration(s) are assigned an ID and appears in the 3rd Party Integrations grid. There will be a separate ID for each integration type (e.g., Fleetio Odometer, Fleetio DTC, etc.). Additional information is provided for Status and Queue Depth. An option to delete the integration(s) is also available.

3rd Party Integrations				
ID	Integration Type	Options	Status	Queue Depth
15589	Fleetio Odometer	api key: [Redacted] account id: [Redacted]	paused <input type="button" value="Pause"/>	2001 <input type="button" value="Delete"/>
15590	Fleetio DTC	api key: [Redacted] account id: [Redacted]	running <input type="button" value="Pause"/>	0 <input type="button" value="Delete"/>
