We have recently introduced the Portal to provide you with an improved user interface, intuitive features, and streamlined processes.

The Portal welcomes you with the Home Page upon sign-in. The Home page offers quick access to features of interest such as reports, alerts, fleet administration, chat support, and more via clickable links. You can also access New Release information, tutorials, and quick links to other helpful resources. In addition, our original Portal, Classic Portal, is still available and accessible from the Home Page.

From the Home Page, use the Navigation Bar on the left-hand side of the screen to access other Portal pages, adjust your preferences, get help, or collapse/expand your Navigation Bar.

Available Portal pages include:

Link: <https://help.gpsinsight.com/docs/about-the-new-portal/> Last Updated: November 3rd, 2020

- **Map** – The Map transforms your workspace to a single 2D map with quick access to management of drivers, vehicles, landmarks, dispatch, and POIs.
- **Dashboards** – View and interact with your customized dashboard(s) from Classic Portal without leaving the New Portal.
- **Alerts** – Create and manage alerts for hierarchies, vehicles, and vehicle groups.
- **Reports** – Run ad-hoc and/or schedule configurable reports with the data you need to see.

**Note.** You can also click on Classic from the Navigation Bar to access the original version of the Portal. This version is still fully functioning.

You may also use the Page tiles to access Dashboards, Map, Reports, and Alerts pages.
