

The Shipments feature allows dispatch or other internal or administrative users to schedule estimated delivery or pickups for their drivers. When shipments are scheduled and assigned to a driver, the driver is notified and can view all details of the trip, including scheduled deliveries and pickups. A Shipments report is also available to list previously scheduled shipments and their details.

## Viewing Scheduled Shipments

**To view scheduled shipments:**

The screenshot shows the 'Shipments' management interface. At the top left is the title 'Shipments' and at the top right is a breadcrumb link 'Manage / Shipments'. Below this is a filter bar with three dropdown menus: 'Carrier' (set to 'GPS Insight'), 'Drivers' (set to 'Rhoades, Kirk (11177)'), and 'Start-End Date' (set to '9/1/2022 - 9/30/2022'). To the right of the date filter is a calendar icon. Further right are two buttons: a blue 'Execute' button with a magnifying glass icon and a green '+ New' button. A yellow box highlights the 'Execute' button, and a hand cursor is shown clicking it.

1. In eDash, click the Shipments tab.
2. Select the appropriate company from the Carrier dropdown list.
3. Select the appropriate driver from the Drivers dropdown list.
4. Select the date range you would like to view from the calendar.
5. Once complete, click **Execute**.

## Creating New Shipments

**To create a new shipment:**

The screenshot shows the 'Shipments' management interface, identical to the one above. The filter bar is the same. However, a yellow box highlights the green '+ New' button, and a hand cursor is shown clicking it.

1. In the Shipments tab, click **New**.
- The Shipment Details window will appear.

### Shipment Details

<b>Estimated Pickup *</b>	<b>Estimated Delivery *</b>
<input type="text" value="10/7/2022"/>	<input type="text" value="10/8/2022"/>
<b>Time</b>	<b>Time</b>
