

# What to Expect: Switching from ELD Focus to ELD Complete

Link: <https://help.gpsinsight.com/docs/switching-from-eld-focus-to-eld-complete/> Last Updated: January 24th, 2023

If you are a customer transitioning from ELD Focus to ELD Complete, you may be wondering what to expect from this change. To help you be prepared, we have compiled the following differences between ELD Focus and ELD Complete.

## What's New

Feature/Functionality	Description
Driver Errors	Driver errors are now fixable with drive time editable to personal drive time
Multi-lingual Support	Mobile and web app now support Spanish and French translation
Support	24/7 Spanish support is now available for all drivers
Tablet: Simplified UI	Less buttons = streamlined usability
Pre/Post Trip Inspection	Simplified functionality with matching data results in less confusion
Tablet Provisioning	Provisioning of tablets is no longer required
Driver Certification	Drivers can now certify more than 8 days of logs within the mobile app
Missing Odometer Issues	ELD Complete resolves all previous missing odometer issues seen with ELD Focus
Vehicle ID Issues	ELD Complete resolves all previous vehicle ID issues seen with ELD Focus
Alerts	<ul style="list-style-type: none"><li>- ELD Malfunction Alerts are now supported</li><li>- Driving without engine data alerts are now supported</li><li>- Special Move alerts are now supported</li><li>- Rejected Carrier Edit alerts are now supported</li></ul>

## What's Different

Feature/Functionality	Description
Unidentified Driving Alert	The alert is no longer integrated with GPS Fleet Tracking landmarks, residing solely within the ELD Complete portal. Future development will look to see if geofenced filters can be applied.
DVIR Non-Compliance Alert	This alert is now located within the ELD Complete Portal.

## What's No Longer Available

Feature/Functionality	Description
GPS Fleet Tracking Portal Availability Dashlet	Current dashlets do not support ELD Complete; support for this feature is planned for mid-2023.
Hours of Service Alert	An alert to notify users that the service limit is near is not currently supported. Future development will look to see if this alert option can be applied.
Time to Complete DVIR Report	This report detailing inspection times is not currently supported.
Driver Portal	A useful driver portal is currently in development.
Exemption Report/App Capabilities	A report to view exemption details is not currently supported.
Uncertified Logs	The ability to search all vehicles for these events is currently not supported; support for this feature is scheduled for release in Q1 2023.
Vehicle Usage Search	There is currently no option for searching to see which driver was driving which vehicle on a given day.
Hours and Miles Report	This report detailing miles driven is not currently supported.
Print Multiple Logs	Currently there is no option to print multiple logs for multiple drivers at one time.
Custom DVIR	Customizable DVIRs are not currently supported; this feature is slated for release in Q1 2023.
Unidentified Driving Events	<ul style="list-style-type: none"><li>- Ability to view unidentified driving events when location is not currently available</li><li>- Ability to assign multiple unidentified driving events is not currently available</li></ul>
