This Product Release Notes announcement includes notification of updates for ELD Complete.

BYOD for ELD Complete

As part of our commitment to providing the best possible technology solutions, we are excited to announce a transition in our Electronic Logging Device (ELD) offerings.

Effective Sept 25, 2024, we are fully transitioning to a Bring Your Own Device (BYOD) approach to our ELD Complete offering. This new approach allows you to use your existing smartphones or tablets, providing a more streamlined and cost-effective way to comply with ELD requirements.

What this Means for You

- **BYOD ELD System:** Our new BYOD solution offers enhanced flexibility and ease of use, allowing you to utilize your own devices to meet ELD compliance requirements.
- **No More Serial Device Tablets:** We will discontinue the sale of our serial device ELD tablets; however, support for this device will continue.
- **Ongoing Support:** We understand the importance of continuity. Therefore, we will continue to fully support all previously sold serial device ELD tablets, including software updates, troubleshooting, and customer service. In addition, we are ready to field your BYOD-related questions, troubleshooting, or concerns.
