  – Addition of 'Allow driver ability to change carrier' option for account with DVIR product only.

- Equipment Management:
  – Addition of 'Can Change Cargo' option upon creating/editing a driver.
  – Addition of the following columns in the Upload CSV Equipment template: Visibility Sets, Connection Type, Device.

Server

- Addition of 'generalComments' field on DVIR Forms API.

- Drivers Management:
  – Inclusion of specific driver's username on the error message when adding a driver with a CDL Number that already exists.

- DVIR Reports:
  – Addition of the 'DVIR Comment' column on the DVIR Defect report.

Bug Fixes

Portal:

- Fixed an issue where the Odometer's unit of distance value is displayed as Miles even though the driver's unit of distance set in the app is km.

- Fixed an issue where the duty hours after clearing Personal Use is not being included in grid chart total hours calculation.

- Fixed an issue where adding Agricultural Exception on a log with existing agricultural events breaks the grid chart.

- Fixed an issue where the grid chart line is not displaying properly while in Personal Use.

- Fixed an issue where the previous log's events won't display once the previous button is clicked multiple times.

Server:
