

ELD Updates

Link: <https://help.gpsinsight.com/eld-flex-release-5-3-2021/> Last Updated: April 28th, 2021

This Release Notes announcement is for ELD Flex iOS and Android users.

Bug Fixes and UI Updates

iOS:

- US Regulations – ELD CSV Output File
 - Fixed an issue where the recorded events' Accumulated Miles and Engine Hours between the Personal Conveyance and ClearPC were set to 0 rather than blank.
- Time Remaining dialog
 - Fixed an issue where the time spent in Well Site during Oilfield Operations was being counted under the Shift clock.

Android:

- Fixed an issue on Split OFF/SB Pairing where violations occurred in the logs screen after disabling the split OFF/SB pairing option.
- Fixed an issue where the Total Hours in the grid chart was not calculated properly after removing Agricultural Operations exception
- Fixed an issue where the dialog “You exceed 172.61692 air-mile” for Short Haul exception was being prompted once the first duty status' lat/long was 1001/1000.
- Time Remaining dialog
 - Fixed an issue where the Time Remaining clocks were counting down even when the Agricultural Operations exception was enabled.
