

This Release Notes announcement is for ELD Flex users.

## What's New

### Server

- Fixed database optimization for slow queries

### iOS

#### **New Features**

- DVIR
  - Now Requires the driver to enter a location before submitting the DVIR if the location field is empty

#### **Fixes**

- Changes to the Odometer field where a driver can no longer enter manual Odometer information when creating or editing an event. This change is based on 7.43 of the ELD Technical Requirements, where vehicle mileage must be obtained via ELD Measurement or Sensing.
- DVIR Screen - Fixed an issue where the displayed Odometer value in View Summary screen was different from the entered Odometer
- Data Transer - Renamed the 'Comment' label to 'Safety Official/Investigation Code' and 'Comment' placeholder to 'Enter investigation code here'

### Android

#### **New Features**

- DVIR
  - Now Requires the driver to enter a location before submitting the DVIR if the location field is empty

#### **Fixes**

- Fixed the issue on Annotate Incorrect Driving where inaccurate end time was indicated while attempting to exclude a driving event with
- Fixed an issue where the Syncing Account Data dialog starts at 0/14 instead of 1/13
- Fixed an issue where the Log Dates were not translated to French
- Fixed an issue where inserting past status reaching 12 AM affects the next day's first event
- Fixed an issue where the log dates were not translated to French
- DVIR screen - Fixed an issue where the displayed Odometer value in View Summary screen is different from the entered Odometer
