

Feature/Functionality Changes & Updates

Map Page

- **Map Preferences Updated:** Update Map Preferences to include options to show Landmarks and/or Landmark Labels on the Map page. With this update, customers can see landmarks/landmark labels by default when viewing the Map Page.

Map preferences

Vehicle preferences

Cluster level: - 88 +

Trails threshold: 30 minutes

Vehicle labels: Vehicle ID and driver name

Map markers:
 Service reminders
 Input status
 Vehicle direction

Weather opacity: - 30% +

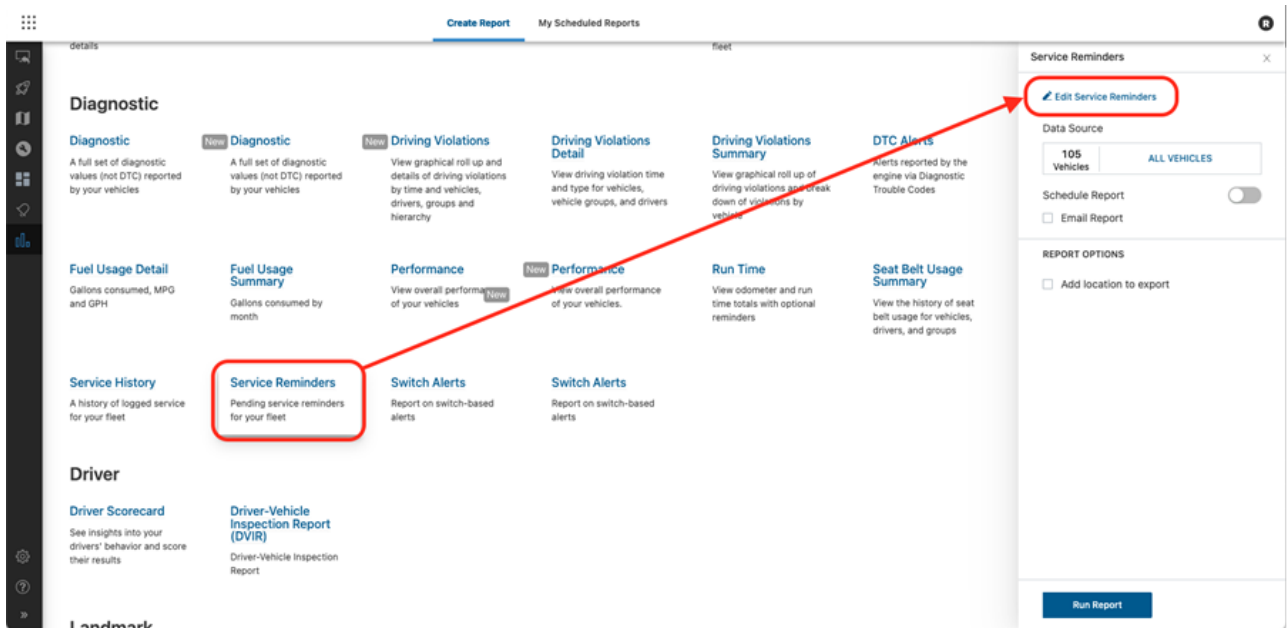

Landmarks

Show by default:
 Landmarks
 Landmark labels

- **Points of Interest (POI) Search Updated:** POI search available from the Map Page now displays POIs closest in proximity to the selected map view location or selected asset (e.g., vehicle, landmark, driver)

Maintenance Page

- **Service Reminders Report:** Edit Service Reminders link available after selecting the Service Reminders Report from the Reports page now directs users to the new Maintenance Page

Safety Camera

- **Driveri Portal - Devices to be Returned Change:** In the “Devices to be Returned” section of the Driveri Portal, a “Non-Functional” tab is now available which offers visibility into replacement and faulty device shipment statuses

Bugs Squashed

Hardware

- Resolved a Bluetooth Fob connectivity and reporting issue seen with PNP-3200 devices with a newly released configuration

Reports/Alerts

- Identified and resolved a query causing a State Mileage Report when run to not return data (displaying “No Relevant Data”) for a sizeable data size or take an extensive length of time to complete for minimal data points
- Resolved an issue causing Unmarked Stops Report to not return data (displaying “No Relevant Data”)
- Deleted blacklisted emails preventing Odd Hours alert notifications (email) from sending to specific recipients

Safety Camera

- Resolved an issue resulting in Driveri driver assignment history to not update
- Fixed a resolution issue seen when viewing Drive360 clips

Map Page

- Resolved an issue preventing selected landmark filters from displaying correctly on the Map page
- Issue resolved preventing device swap functionality for accounts with device deactivations disabled

Maintenance Page

- Resolved an issue causing a page crash when a user creates bulk maintenance services
- Resolved an issue causing a page crash when a user edits a template used to create services applied to all vehicles
