

## Feature/Functionality Changes & Updates

### □ Explore Page

- **Explore Page Link Update:** Updated the Compliance link on the Explore page of the GPS Tracking Portal to direct users to the correct site.

### □ Alerts

- **Fleet All-in-One New Alert Support:** Updated the mapping for the Air II Power Event to the External Power Lost alert, enabling cameras on the All-in-One service plan to notify users when power is lost.

### □ Reports

- **Activity Detail Report Update:** Updated the Activity Detail report to include the In-Cab Alert column for better visibility and tracking of driver alerts.

### □ Classic Portal

- **Classic Portal Change:** Added a “Back to Home” button to several Classic Admin pages to help users easily navigate back to the new UI.

## Bugs Squashed

### □ Map

- Resolved an issue where users were unable to register vehicles using the Create Vehicle drop-down option
- Resolved an issue where usernames were displaying inconsistently across the platform
- Fixed an issue where editing an asset from the Asset Card defaulted the selected entity type to Vehicle
- Fixed an issue where hovering over the Vehicle Class drop-down in the Edit Vehicle tab of the Vehicle Card displayed the wrong icon
- Fixed an issue where the “Nearby” column on the Address Card did not display data when searching for a specific address

## Alerts

- Resolved an issue where the vehicle label was missing in service reminder alerts
- Fixed an issue where the Low Battery alert was not triggering as programmed

## Maintenance Page

- Resolved an issue where customers were not receiving text alerts when their vehicles were approaching scheduled maintenance

## Admin Page

- Fixed an issue where the “Add New Vehicle” button on the vehicle admin page was not working
- Fixed the UI appearance of the + New Group button on the Admin: Driver Groups page to ensure consistency between Admin tabs
- Updated the icons in the action column of the table on the Admin: Landmark Groups page to match those used across other admin tabs

## Reports

- Fixed an issue where a driver was mistakenly included in a report associated with a different account
- Fixed an issue where the reported times in the Fuel Card Transaction report did not match the actual times the vehicle was at the pump
