Portal Feature/Functionality Changes & Updates

Map

- **Specialty Vehicle Icon:** Vehicles can now be assigned a specialty icon for quick visual identification on the map.

Admin Page

- **Driver Export:** The export from the Admin: Drivers tab now includes each driver's assigned Driver Group, making it easier to identify ungrouped drivers.

Bugs Squashed

Map

- **Asset History Header:** Fixed a display issue where the Vehicle History panel showed duplicate header bars for assets from the History tab on the Map page.
- **Landmark Dispatch:** Fixed an issue where clicking the "X" to remove a pre-filled landmark destination in the Dispatch pop-up caused the location to briefly clear before reappearing.
- **Map Pop-up Close:** Added a close button to map pop-ups in the History tab, which previously had no way to be dismissed.
- **Focus Icon Alignment:** Fixed an issue where the "focus" vehicle icon was positioned off-center within its background square, sitting too far to the lower left.
- **Focus Icon Moving Status:** Fixed an issue where the "focus" vehicle icon did not display for moving vehicles on the New Portal map, now matching Advanced Administration (Classic) Portal behavior.

Advanced Administration

- Focus Icon: Restored the missing "focus" vehicle icon from the Advanced Administration (Classic) Portal, which had disappeared from the map and the Manage Vehicle Icons page.
