

Portal Feature/Functionality Changes & Updates

□ Map

- **History map arrows:** Added the option to toggle directional arrows on or off, allowing users to customize their view.

□ Admin: Vehicle Groups

- **Link separation:** Removed the connection between Customer Sites links and Public Share Map links so they operate independently.

□ Alerts Page

- **Alerts page:** Redesigned the table and layout to align with the Admin page structure.
- **Alerts search:** Added support for searching the Alerts table by name and type.
- **Alerts export:** Added the ability to download the Alerts table directly from the Alerts page.
- **Alerts filters:** Updated the Alerts table filters to use the new UI on the Alerts page.

Bugs Squashed

□ Map

- Resolved an issue where Trail Threshold updates were not reflected on Customer Sites
- Resolved an issue where history displayed locations the vehicle had not visited

□ Reports Page

- Resolved an issue preventing new users from running certain reports despite having the correct permissions
- Resolved a 500 server error that occurred when customers ran the Driver Scorecard report

⚙ Maintenance Page

- Resolved an issue where updating a vehicle's odometer did not correctly reset the "Due at" Service
