Feature/Functionality Changes & Updates

Map

- **Diagnostic Odometer Data Value:** Adjusted the storage of the Diagnostic Odometer from tenths to hundredths
- **Disable Pop-Overs:** Added the option for users to disable Map Pop-Overs from map preferences

Reports Page

- **Service Reminders Report:** Updated the Service Reminders report to source data from the Maintenance Page rather than the legacy Service Reminders in Classic.
- **Select One Vehicle Option:** Added the ability to select a singular vehicle on the Service Reminder and Service History reports

Bugs Squashed

Map

- Fixed a bug where driver assignments to vehicles were not persisting, causing drivers to be automatically unassigned

Camera Media Library Page

- Included error details in customer feedback when a manual Driveri clip request fails
- Fixed a bug that caused inaccurate timestamps when retrieving clips

Reports Page

- Fixed a bug where the ‘last reported date’ for a vehicle displayed incorrectly when the Run Time Report was run for a group, but showed correctly when run for an individual device
- Resolved an issue that prevented customers from downloading or emailing the Driver Scorecard report

Alerts Page

- Resolved an issue where maintenance alerts were being sent at incorrect times instead of when the alert was triggered
- Resolved a bug that caused customers to receive invalid DTC alerts even after check engine issues had been cleared
- Fixed a bug that prevented customers from receiving Ignition Alerts
- Resolved an issue where the Alert Calendar date picker selected incorrect dates due to discrepancies with the system time or timezone settings on the user's computer

⚙ Maintenance Page

- Fixed a bug that caused the odometer reading at service completion to be duplicated
