We are introducing the new GPSI Connect Tablet!

The GPSI Connect Tablet is the successor to the direct MDT. This new tablet offers an improved OS, design, and a handful of new features and functionality. With the new GPSI Connect Tablet, significant MDT issues such as docked/undocked problems, poor harness connectivity, and potential for expanding batteries are a thing of the past.

Check out the device page here: <https://help.gpsinsight.com/device/gpsi-connect-tablet/>.

What's New?

- Increased Functionality
- Environment and Dock Improvements, including: Magnetic Seal for Docking, Improved Battery and Power, and Greater Resistance to Environmental Conditions
- Expanded Support, allowing Remote Access to the Tablet for Troubleshooting
- Compatible w/GPSI-5000 Only
- And More!

Note. If you are interested in purchasing the GPSI Connect Tablet for your fleet, contact your Account Manager for more information!
