This Release Notes announcement highlights new hardware updates.

AT-3100

We are introducing the AT-3100, an upgraded model of the AT-3000. The AT-3100 is a Cat-M1 device, which will allow us to grow into greater Bluetooth (BLE) functionality and other future enhanced features.

AT-3000 series devices are ideal for tracking assets with power (e.g., tractors, backhoes, loaders, ATVs, mowers, etc.) These devices support multiple switch/sensor inputs as well as outputs for relays to control fuel pumps, starters, and other remote devices.

For additional information, contact your Account Manager and visit the AT-3000 Series device page: [AT-3000 Device Page](#).
