

# HOS Server Software Update - Version 7.12

## ELD Updates

---

Link: <https://help.gpsinsight.com/hos-server-software-update-version-7-12/> Last Updated: March 27th, 2019

This HOS Server Update announcement for GPS Insight includes updates for Driver Status Options and Yard Moves.

The updates listed below are only available for updated tablets. Please use the instructions provided in the article [Using the GPS Insight Updater App](#) to update your software to eFleetSuite 1.8.

### Driver Status Options

#### Oilfield Status Options

Two new status options are available to support Canadian and US oilfield regulations:

- OFFW - This will record driver activity as "Off duty, waiting at well site (OFFW)" on logs.
- OFFS - This will record driver activity as "Off duty, sleeping at well site (OFFS)" on logs.

Please see the [During Your Shift](#) article for additional information.

### Yard Moves

#### Yard Move Improvements

Yard moves condition is not cleared unless the vehicle exceeds 20 mph within a yard location.

Please see the [During Your Shift](#) article for additional information.
