

Note. As of November 2025, the Magellan Mapping Navigation App and License product has been discontinued.

The new 2024 Magellan Map update is now available for all users with an active license and an MDT or **GPSI Connect Tablet**.

Improvements include:

- Improved road mileage accuracy (~1.07% or 110,276 miles)
- Fixed various address locations
- Added/updated POI (Points of Interest) locations (~15,000 points)

Please connect your tablet to wifi and the application will automatically search for and download the file update.
