This Product Features and Updates announcement for GPS Insight **Standard, Pro and Enterprise** includes updates for Reports and Bug Fixes.

Reports

Fuel Card Transaction Report – New Export Data

The following columns have been added to the Fuel Card Transaction Report when exported:

- Transaction Time – As recorded by the Fuel Card.
- Pump Time – As recorded by the fuel pump.

New Admin Report – Vehicle Recall Report

This new admin report provides vehicle recall notice information by vehicle VIN as issued by the NHTSA (National Highway Traffic Safety Administration) as concerns your fleet vehicles.

Vehicle Recall Overview »

Sorted By	Vehicle	Vehicles Shown	6 of 7 (85%)
Vehicle Group	CG-Company Vehicles (7 vehicles)	Report Created	July 1, 2019 8:57:17 AM

* VIN derived year, make, model may not match the vehicle record.
** Recalls are based on the registered VIN of each vehicle.

New Report – New State Mileage Report

A new State Mileage Report is now available. We have added the following to this report:

- Country (if your fleet has active vehicles in more than one country)
- Gas Price/Gallon (\$) Option
- Tool tips (Data origin indication)
- Updated, improved column headers

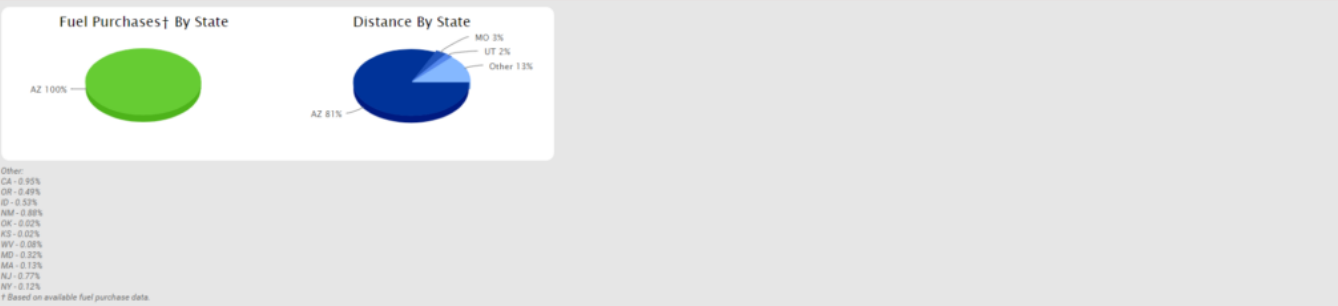

State Mileage Overview »

Total States Visited	20 states	Sorted By	Vehicle
Total Distance Traveled	42,461 miles	Vehicle Group	Company Vehicles (69 vehicles)
Total Fuel Purchased	2,303.296 gallons	Report Time Period	Jun 7 12:00 AM to Jul 1 11:59 PM
Total Spent on Fuel	\$7,165.20	Report Created	July 1, 2019 11:23:45 AM

 The distance column in this report uses data from the ECM when available. If unavailable the information defaults to GPS distance.
 The fuel usage readings based on runtime are not reported by the vehicle, and should not be considered reliable. They are a rough estimate based on vehicle driving time, speed, idle time, and engine size (from Idle GPH).

Note. Prefer the old State Mileage Report? No worries! The old State Mileage Report is still available for you to use.

See [Available Reports](#) for additional information.

Administrative

Edit Vehicle Details - Vehicle Recall Data

A new section, Vehicle Recall Data, that lists issued recalls for a vehicle as reported from the NHSTA (by VIN) is now available on the Edit Vehicle Details page. Issued recalls may be edited from this section by dismissing or marking the recall issue as repaired.

Bug Fixes

Portal - Resolved Issues and Bugs

The following issues and/or bugs have been resolved this month:

- **Recall Data - Failed Connection Interpretation:** If the solution is unable to connect correctly to the NHSTA recall site, the data is stored as no data result.
- **Tampering Alert Report - Description (Standard Only):** The description for the Tampering Alert Report displaying inconsistent parentheses when selecting the report from the Report List.

Portal Updates

Link: <https://help.gpsinsight.com/product-features-and-updates-06-2019/> Last Updated: May 28th, 2019

- **Fuel Card Usage Report - Column Sort:** CPG, MPG and % Idle column sorting functionality not working.
- **Hierarchy (Enterprise Only) - Branch Properties:** Hierarchy branch properties not loading data.
- **DTC Alert - Email Notification:** The DTC email alert is providing an additional time in the body of the alert, which is inaccurate.
- **Idle Alert - Undeliverable:** Customer received an email stating an Idle Alert could not be delivered because the email 'alerts@gpsinsight.com' could not be found, or was misspelled.
- **Fuel Report - Repetitive Timestamps (Standard Only):** History is showing some repetitive timestamps.
- **New Users Not Available:** Two users created were unavailable to customer.
- **Messaging (Standard Only):** After selecting a vehicle that has SMS information filled out with a valid number and SMS checked as preferred messaging type, clicking the Messages link for the vehicle's pop-up does nothing.
- **Vehicle Selector - Hierarchy Labels (Enterprise Only):** The Vehicle Selector is showing hierarchy path labels as vehicle groups under the drop down menu, on top of the actual hierarchy paths themselves.
- **Fuel Card Transactions Report - Cost column:** The values in the Cost column of the Fuel Card Transaction report's export column do not include the \$ sign.
- **Device Registration:** Unable to register one device. Error received that says "Unable to Register Vehicle - registration error: Unable to register the Vehicle - vin."
- **Fuel Card Transaction Report - Export:** Exported column values in incorrect order or missing.
- **Dwell Time Report - Attribute missing:** The Dwell Time report never shows additional attribute columns despite the menu selection to add them appearing to work correctly.
- **Hierarchy - Custom Report Group:** The custom report groups creating will not save.
- **Service Reminders Report - Driver Visibility:** Driver visibility for the Service Reminders report is not accurate. It should be restricted by user access to specific drivers, but instead all names seem to be restricted so 'ASSIGNED' or " is showing.
- **Run Time Report - Driver Visibility:** Driver visibility for the Run Time report is not accurate. It should be restricted by user access to specific drivers, but instead all names seem to be restricted so 'ASSIGNED' is showing.
- **Fuel Card Transaction API:** The Fuel Card Transactions API will not allow a single day request and is not returning all transaction within the specified time frame.
- **Odd Hours Alert - Incorrect Triggering:** Odd Hours Alerts are incorrectly triggering.
- **Diagnostic Report - Hierarchy Vehicle Group (Enterprise Only):** Diagnostic report run on a

Portal Updates
