Feature Updates

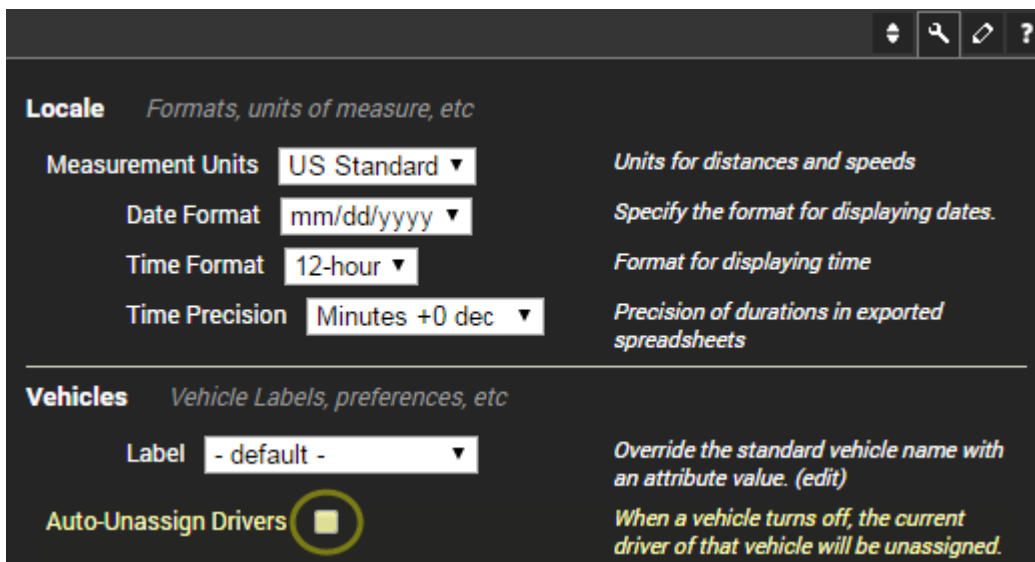

Link: <https://help.gpsinsight.com/product-features-and-updates-11282016/> Last Updated: November 29th, 2016

This Product Features and Updates announcement for GPS Insight **Pro/Enterprise** includes updates for Administration Functions.

Administration Functions

User Preferences - Auto-Unassign Drivers

The **Auto-Unassign Driver** setting in **User Preferences** automatically removes a **driver assignment** from a vehicle as soon as the vehicle's ignition turns off. Selecting this check box applies to all driver assignments for the account and overrides any manual assignment preferences that might have been previously set. This option is highly encouraged **ONLY** for accounts that use keyfobs for driver assignment.

The screenshot shows a dark-themed user interface for 'User Preferences'. At the top right, there are icons for home, search, edit, and help. The main content is divided into two sections: 'Locale' and 'Vehicles'. The 'Locale' section includes settings for 'Measurement Units' (US Standard), 'Date Format' (mm/dd/yyyy), 'Time Format' (12-hour), and 'Time Precision' (Minutes +0 dec). The 'Vehicles' section includes a 'Label' dropdown set to '- default -' and an 'Auto-Unassign Drivers' checkbox, which is checked and highlighted with a yellow circle. Each setting has a descriptive tooltip.

HOS Integration Configuration - Add HOS Driver ID/Association

The **Add HOS Driver ID/Association window** includes a new **Portal Driver** option for associating an existing GPS portal driver to the eFleetSuite driver profile. GPS portal drivers that appear dimmed have already been associated to another profile.

Add HOS Driver ID/Association ✕

| | |
|---------------|----------------------|
| HOS Driver ID | <input type="text"/> |
| Portal Driver | -- NO DRIVER -- |
| First Name | -- NO DRIVER -- |
| MI | Adam Gabardy |
| Last Name | Adam Goldman |
| Home Terminal | Adam Varner |
| | Adam Warner |

Note. The [HOS Integration Configuration page](#) is available only for accounts that are enabled for Hours of Service.

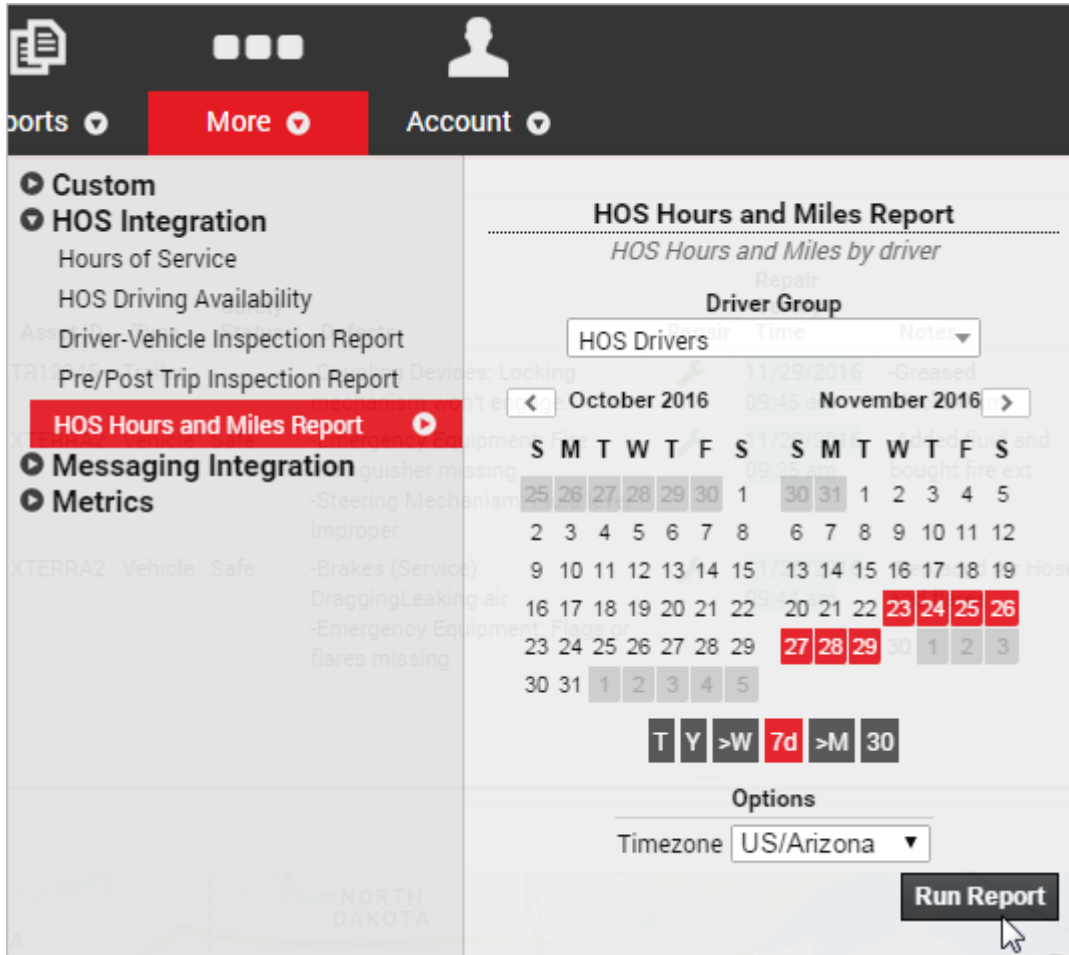

HOS Integration - HOS Hours and Miles Report

A new **report** is available for HOS Hours and Miles. This report appears under the **More** menu of the GPS portal if it is configured for your account.

The screenshot shows a web application interface for generating an HOS Hours and Miles Report. On the left is a navigation menu with categories: Custom, HOS Integration (selected), Messaging Integration, and Metrics. Under HOS Integration, 'HOS Hours and Miles Report' is highlighted. The main content area is titled 'HOS Hours and Miles Report' and 'HOS Hours and Miles by driver'. It features a 'Driver Group' dropdown set to 'HOS Drivers', navigation arrows for 'October 2016' and 'November 2016', and a calendar grid. The calendar shows dates from October 25 to November 30. A summary bar below the calendar displays 'TY >W 7d >M 30'. An 'Options' section includes a 'Timezone' dropdown set to 'US/Arizona'. A 'Run Report' button is located at the bottom right of the interface.

This report show hours and miles for each HOS driver and pulls data directly from your **Hours of Service** solution via the eFleetSuite portal.
