Feature Updates

Link: <https://help.gpsinsight.com/product-features-and-updates-12272016/> Last Updated: December 27th, 2016

This Product Features and Updates announcement for GPS Insight **Pro/Enterprise** includes updates for Dashboards, Reports, Administration Functions.

Dashboard Updates

Map Dashboard - Search Support for Lat/Lon

The Map Dashboard **search functionality** now includes results based on an entered latitude and/or longitude coordinate(s). If entering both values, separate them by a comma. Clicking an item from the Search Results drops a pin in that location.

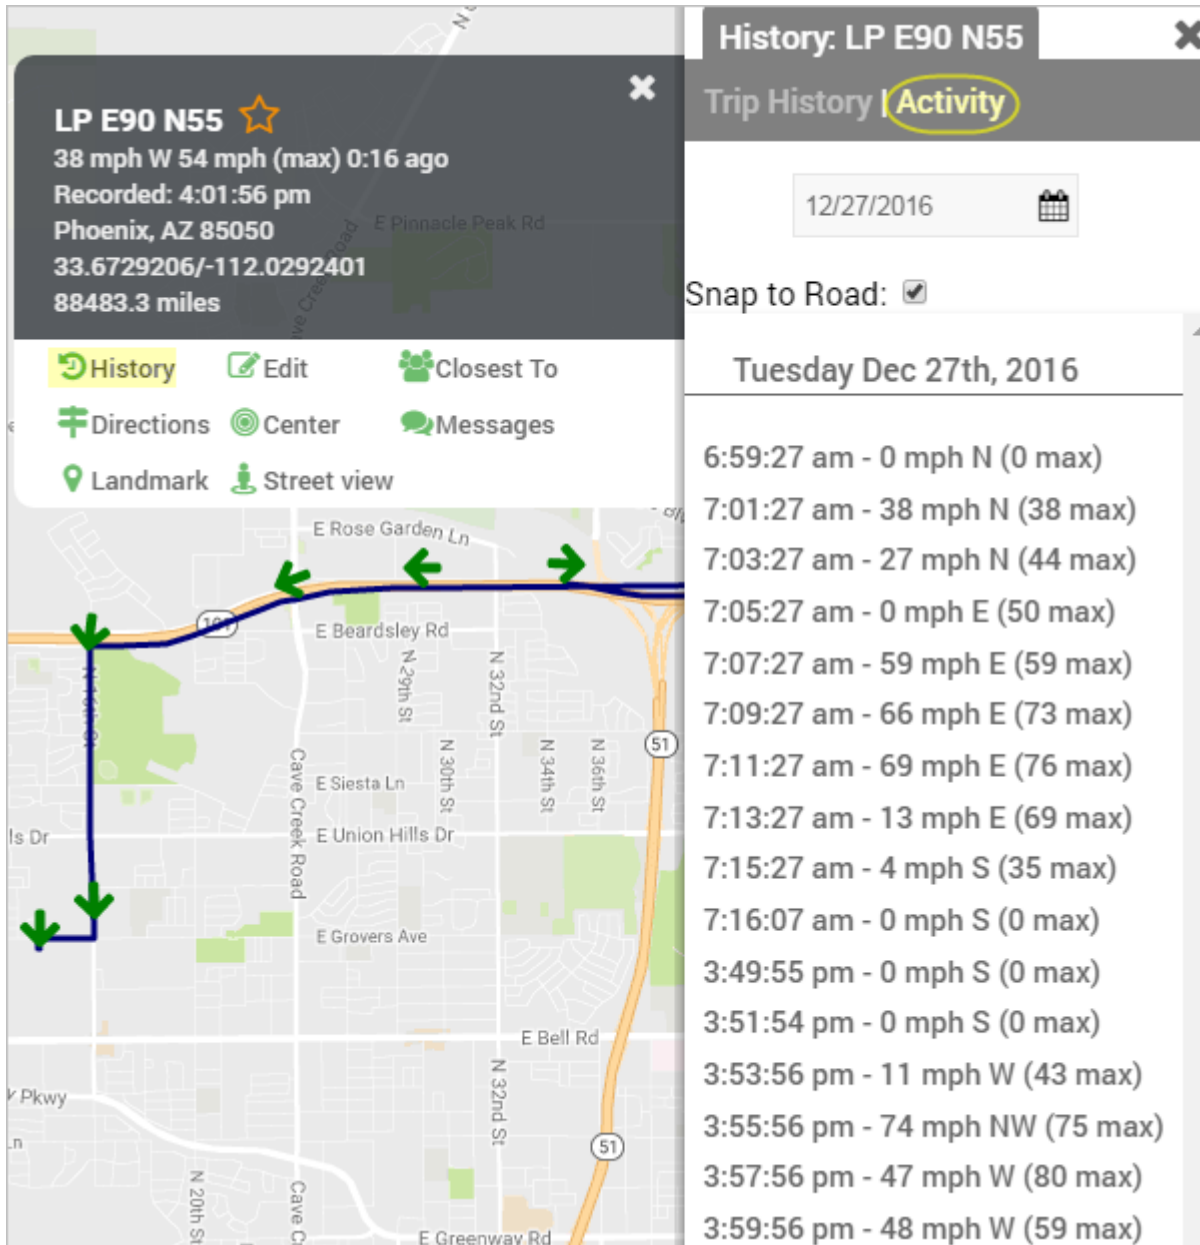

Map Dashboard - New History Activity Option

In addition to **viewing historical vehicle activity** by trips, you can now view raw activity not organized by trip. Click a history event or zoom into the map to view the history trail with directional indicators.

Report Updates

Duration Format Preference for Spreadsheet Exports

Starting January 1, 2017, **all** spreadsheet exports (e.g., scheduled reports, exported reports) will use a common duration format for stop time, idle time, **and so on**. If you are importing report spreadsheets with Excel or macros, you will see changes to column headings and duration formatting that will affect your import processes.

Prior to this standardization effort, spreadsheet exports used varied duration formats for different report types. Using a consistent format for all exports ensures a more accurate way to compare data between multiple reports.

Using the **User Preferences** icon, you can choose the format that you want to use:

If you do not set a preference, the default setting is **Minutes, 0 Digits**.

Duration format shown in the HTML version of applicable reports remain unchanged. For example, the Fleet Idle Summary report shows Run Time, Idle Time, Longest Idle Stop, and Average Idle Stop in minutes and hours in

Product Features and Updates - 12/27/2016

Feature Updates

Link: <https://help.gpsinsight.com/product-features-and-updates-12272016/> Last Updated: December 27th, 2016

the HTML version:

Fleet Idle Summary Report »							
Idle Time Report for Service (4 vehicles)							
Vehicle	Distance	Run Time	Idle Time	% Idle	Idle Stops	Longest	Average
Brent PNP-3000VB 	344.2 mi.	12.96 hrs	8.75 hrs	67%	24	1.77 hrs	21 min
Lance PnP 	677.8 mi.	24.91 hrs	40 min	2%	5	12 min	8 min
Totals	1,022.0 mi.	37.87 hrs	9.42 hrs	24%	29	1.77 hrs	19 min

When that report is exported or scheduled, however, those values are formatted according to the Duration Format set in [user preferences](#) (e.g., using minutes only).

Vehicle	Serial Nur	Distance (Total Run Time (minutes)	Total Idle Time (minutes)	% Idle	Idle Stops	Longest Idle Stop (minutes)	Avg Idle Stop (minutes)
Brent PNF	4.54E+09	344.2	778	525	67%	24	106	21
Lance PnP	4.54E+09	677.8	1495	40	2%	5	12	8

Administration Updates

Metrics - New Sum Scorecard Metric Type

A new **Sum Scorecard metric** is available, which is a special type of metric (a metric made of other “Count” metrics). It is intended as an alternative scorecard for weighted averages. It applies only to the following metric types: Count Vehicle Stops, Count Vehicle Idle Stops, Count Vehicle Landmark Visits, Count Driver Assignments, Count Speeding Events, Count Alerts Triggered, Count Acceleration Events, Count Deceleration Events, and Count Drivers.

New Sum Scorecard Metric ✕

Label

- Acceleration Count 
- Deceleration Count 
- Speeding Count 

Add Events Metric
