This Product Features and Updates announcement for GPS Insight **Standard** includes updates for Administrative Features and Mobile.

### Administrative Features

#### Landmark - Display Option

The default radius setting for displayed landmarks can now be adjusted. To request a change to this default radius setting, contact the **Support Team**.

**Note.** Currently, the default setting is configured so that landmarks that are 10,000 ft. or more in radius are not displayed.

### Mobile

#### GPS Insight Manager App (Android) - Version 1.3.2

This update is now available from the **Google Play Store** and includes the following:

- Bug fixes and performance improvements
- Map Follow Setting - Allows you to set your preference for following vehicles (Selected, Starred, or None) on the map from the **Menu**. See **Using the Android Manager Menu** for details.
