This Product Features and Updates announcement for GPS Insight **Pro/Enterprise** includes updates for Dashboards/Maps, Administration Functions, and Mobile.

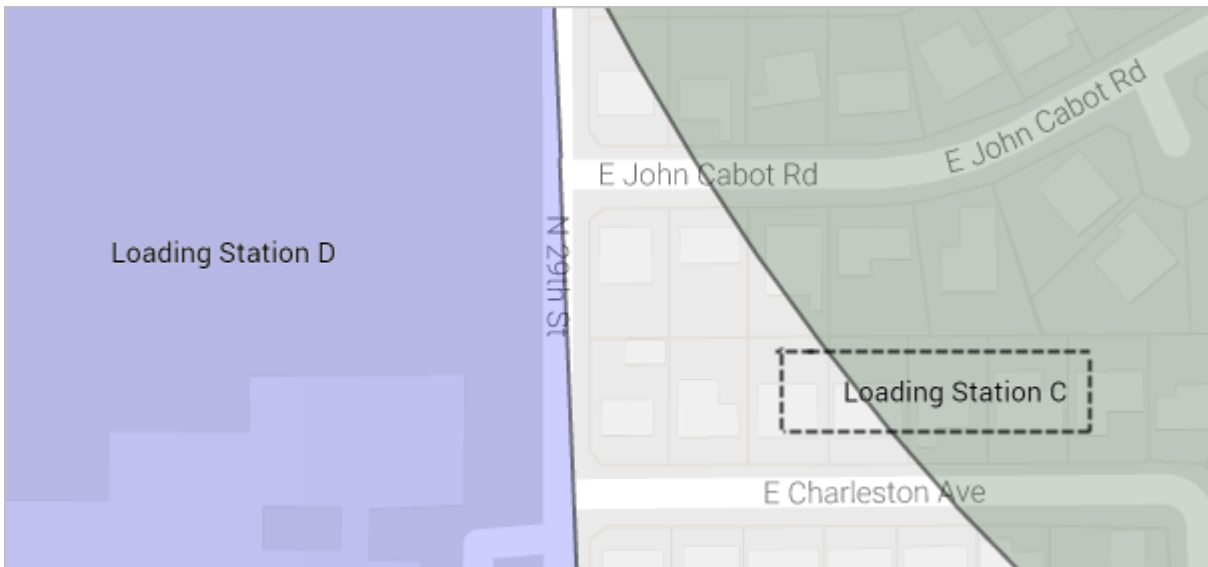

## Dashboard/Map Updates

### Map Dashboard - New Naming Convention and Landmark Display Updates

The **Map Dashboard** is now referred to as “Map.” You can still find it in the Dashboard drop-down.

Additionally, the landmark labels better support multiple and overlapping landmark boundaries. When zoomed into the map, landmark labels now recenter and float around the perimeter as you move your point of view on the map.

## Administrative Updates

### HOS - New Integration Configuration Options

The **HOS Integration Configuration** page continues to provide improved integration functionality between the **ISE application** and the GPS portal for **Hours of Service** customers.

**Driver integration** now allows you to choose Home Terminal, Web Login Role, and Terminal Access, which are
