This Product Release Notes announcement includes notification of updates for the Portal.

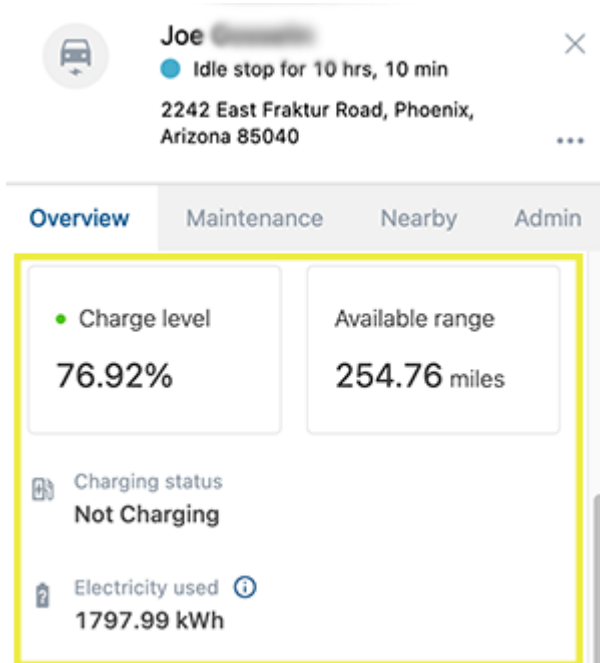

Portal

Introducing EV Data

EV data for your electric vehicles is now shown on Vehicle Cards from the Map Page in the Portal. EV data includes:

- Charge Level
- Available Range (supported vehicles only)
- Charging Status
- Electricity Used (lifetime summary beginning at device installation)

Note. This new feature is available for customers on the EV Fleet plan with electric vehicles equipped with **GO9** devices.

To learn more, please visit [Vehicle Card Status Bar](#).

Additionally, you can now create an alert to send notification of low battery for EVs using the Diagnostic Alert from the [Alert Page](#) in the Portal.
