

## Feature Updates

Link: <https://help.gpsinsight.com/release-notes-12-19-2019/> Last Updated: December 17th, 2019

This Product Release Notes announcement for GPS Insight **Standard, Pro, and Enterprise** customers includes updates for Alerts, Mobile, and Bug Fixes.

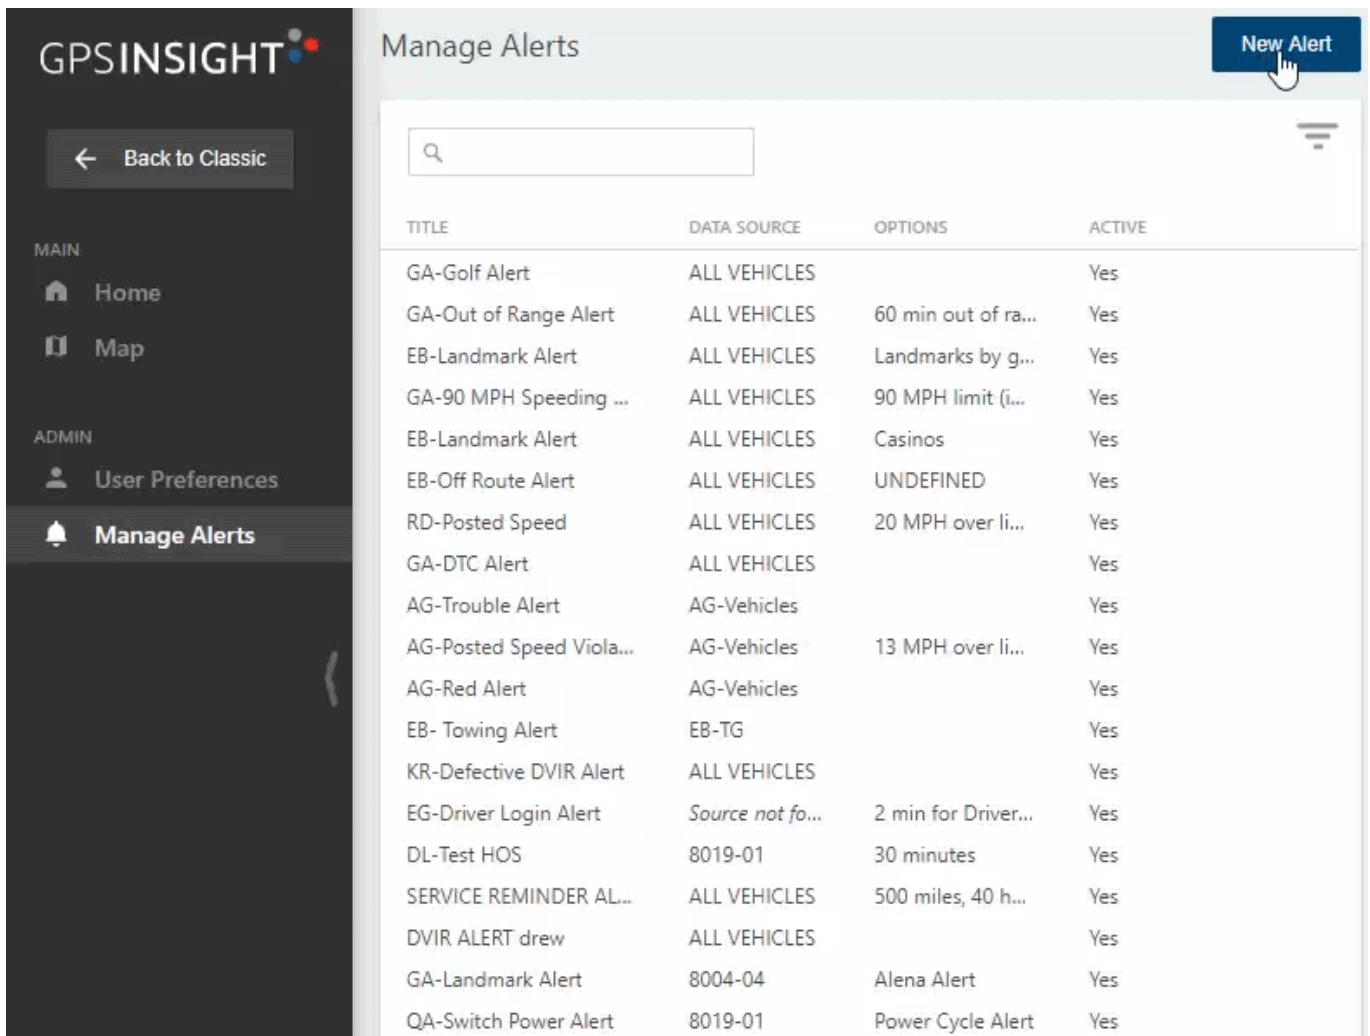

## Alerts

### NEW - Alerts Page

Enterprise customers can now create and edit alerts within the new Alerts page.

For more information on creating and editing alerts, see:

- [About Alerts](#)
- [Adding Alerts](#)
- [Editing Alerts](#)

The screenshot shows the 'Manage Alerts' page in the GPSINSIGHT application. On the left is a dark sidebar with the 'GPSINSIGHT' logo and navigation options: 'Back to Classic', 'MAIN' (Home, Map), and 'ADMIN' (User Preferences, Manage Alerts). The main content area is titled 'Manage Alerts' and features a search bar, a 'New Alert' button, and a table of existing alerts.

## Mobile

### ELD Mobile

The GPS Insight ELD Mobile app is a smartphone-based app (iOS and Android compatible) that is fully FMCSA-certified and provides both Hours of Service (HOS) and DVIR support in addition to data for IFTA reporting. ELD Mobile offers a full-featured hosted portal that provides the ability to monitor drivers in the fleet, examine and edit logs as necessary, set up custom inspection categories, view reports (including state mileage), and administer drivers (such as adding or deleting drivers). The portal and device stay synchronized to provide a near real-time view of your fleet.

**Note.** ELD Mobile is only compatible with the GPSI-5000 device. If interested, contact your Account Manager

## Bug Fixes

### Bug Fixes & Enhancements

- Bugs were fixed for the Portal and Mobile Apps
- UX enhancements were deployed.
