

This Product Release Notes announcement includes notification of Portal updates.

Portal

Device Management: Deactivate, Transfer, and Swap Device

You can now deactivate, transfer and/or swap a device directly from the Vehicle Card Header on the Map page of the Portal. This is helpful in case you need to retire a vehicle and/or replace it with another one or no longer need the vehicle in the fleet and would like to manage your devices quickly from the Map.

Please see [Managing Devices: Transfer, Swap, and Deactivate](#) for more information.
