Portal Updates

Driveri Driver Sync

The Driver Sync toggle is now available to automate a sync of driver information from the GPS Fleet Tracking Portal to the Driveri Portal. This automation ensures the creation, update, and deletion of driver profiles match across both platforms, enhancing efficiency and ensuring data consistency.

Benefits

1. **Consistency and Accuracy:** The use of Driveri Driver Sync ensures that driver data is consistent and uniquely identified across both platforms, reducing manual errors.
2. **Efficiency:** Automatic and real-time syncing mechanisms streamline operations, saving time and reducing the need for manual data entry.
3. **Control:** The toggle provides flexibility and control, allowing you to manage the synchronization process based on your organizational needs.
