This Product Release Notes announcement for Enterprise customers includes an update for Hardware.

Hardware

Geotab Driver ID Now Available

Geotab Driver ID is now available for GO9™ devices. Using Near Field Communication (NFC) with the Geotab GO device, Geotab Driver ID identifies drivers operating vehicles in a fleet at any given time with a keyfob or sticker. Drivers swipe in at the start of their trip, linking them to their vehicle.

Please see frequently asked questions concerning Geotab Driver ID available in the Geotab Driver ID – FAQ for additional information.

If you would like to see information regarding how to assign a driver via keyfob/sticker, please see Assigning a Driver to a Vehicle.
