This Product Release Notes announcement for Standard and Enterprise customers includes notification of updates for the Portal.

Portal

Introducing the new Driver Scorecard Report

With the new Driver Scorecard Report, you can view interactive graphs, summary totals, and detailed data providing insight into driver behavior from safety events in the form of a weighted score (A-F grade). This report allows you to utilize and leverage driver scorecard data to evaluate the risk of drivers in your fleet, identify risky drivers, acknowledge safest drivers, and evaluate driver behavior trends over time.

Note. This report is available to customers with PNP, GPSI-5000, and other supported devices. Driver feature is available to Enterprise customers only, please contact your Account Manager for additional information to learn more.

Driver Scorecard

ALL DRIVERS

3 Idle Time (hr)	387 Hard Turn Events	280 Rapid Acceleration Events	9 Hard Braking Events	1,910 Speeding Events
410 Seat Belt Unbuckled (hr)	0 First Movement Reverse Events	2,736 Total Violations	21,621 Distance*	900 Drive Time (hr)

* Distance in MI, per 100 MI
