Scheduling Advanced Reports

What's Launching?

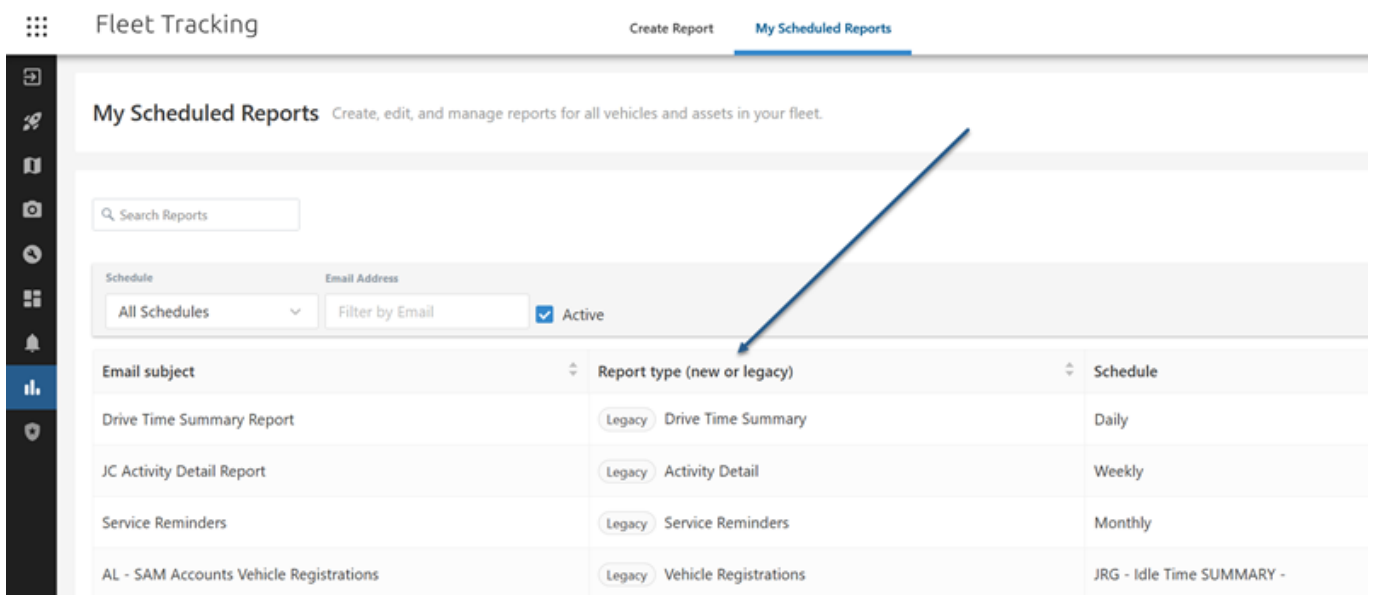

We're excited to announce a powerful new enhancement to reporting: the ability to schedule advanced reports directly within the GPS Insight Portal from the Reports page. This enhancement allows our new robust reporting to deliver automated, reliable, and insightful scheduled reports.

You can now take advantage of the new advanced reporting and visualization engine—without needing to learn a new workflow or switch interfaces.

At launch, scheduling will be available for the five existing advanced reports in the GPS Insight Fleet Tracking Portal:

- Fleet Utilization
- Diagnostic
- Driving Violations
- Driver History
- Driver Scorecard

We've also refreshed the My Scheduled Reports tab in the Reports page with a streamlined UI aligned with the rest of the Portal. Each scheduled report clearly indicates whether it is a New or Legacy report, making it easy for your users to identify upgrade-ready reports.

The screenshot displays the 'My Scheduled Reports' section of the GPS Insight Fleet Tracking Portal. The interface includes a search bar, a filter for 'All Schedules', and a table of reports. A blue arrow points to the 'Report type (new or legacy)' column, which shows 'Legacy' for all listed reports.

Email subject	Report type (new or legacy)	Schedule
Drive Time Summary Report	Legacy Drive Time Summary	Daily
JC Activity Detail Report	Legacy Activity Detail	Weekly
Service Reminders	Legacy Service Reminders	Monthly
AL - SAM Accounts Vehicle Registrations	Legacy Vehicle Registrations	JRG - Idle Time SUMMARY -
