## GPS Insight Inspect+: Smarter Inspections Start Here

### □ What's Launching?

We're excited to introduce GPS Insight Inspect+, a fully integrated vehicle inspection and maintenance solution now available directly within the GPS Insight platform. This launch brings together digital inspections, maintenance management, and driver workflows into one connected experience — no separate platforms, no paper trails, no gaps.

GPS Insight Inspect+ is a digital vehicle inspection system powered by Whip Around, accessible through both the GPS Insight web portal and a GPS Insight branded mobile app. It is available in two plans, with optional upgrades to extend functionality based on your team's needs.

- **Inspect** – A complete Driver Vehicle Inspection Report (DVIR) solution that can be applied to a specific subset of your fleet. Fleet managers access inspection data through the GPS Insight portal, while drivers complete inspections through the GPS Insight Inspect+ mobile app (iOS and Android compatible).
- **Inspect+ & Maintain** – Everything in **Inspect**, plus a full maintenance management solution. This plan requires enrollment of your entire GPS Insight fleet and replaces the Maintenance Page. Vehicle data is automatically synced into Inspect+ upon activation.

Optional upgrades are available!

---

### □ Benefits

- **One platform, fully connected.** Inspect+ lives inside the GPS Insight portal, so your team never has to navigate to a separate site to manage inspections or maintenance.
  - **A mobile experience built for your drivers.** Drivers use the GPS Insight Inspect+ mobile app to complete inspections in the field — faster, more consistent, and accessible with or without connectivity.
  - **Real-time visibility for fleet managers.** Monitor compliance, review findings, and take action directly from the portal as inspection activity happens.
  - **Inspection findings connected to maintenance.** Issues flagged during an inspection flow directly into the maintenance workflow, reducing delays and keeping vehicles road-ready.
  - **Flexible plans that fit your fleet.** Apply Inspect+ to a subset of your vehicles or scale up to full fleet enrollment with Inspect & Maintain — you only pay for what your operation needs.
