New Portal Page: Camera Media Library

Users with applicable permissions can now access and manage all camera media clips for vehicles equipped with Driveri or Drive360/AIR II cameras using the Camera Media Library page directly within the Fleet Management Portal.

Note. You must have the Camera Media permission enabled to see the Camera Media Library page in the Portal.

Benefits

- **Enhanced Control** - You can manage your camera clips and view your clip quota directly in the Portal
- **Visual Insights** - Camera events are plotted on a map displayed on the Camera Media page, providing users with a visual layout of camera event locations
- **Comprehensive Media Management** - Clips can be filtered by Vehicle, group or hierarchy (Enterprise or Advanced Administration customers only), with the option to identify a specific time frame.
