

Fleet Tracking Portal: New DriverID Admin Tab

We're excited to introduce DriverID Admin — a new tab of the Admin Page designed to give users greater visibility and control over DriverID management.

The screenshot shows the 'Admin: DriverIDs' interface. It features a sidebar with navigation options: Users, Vehicle groups, Drivers, DriverIDs (selected), Driver groups, and Landmark groups. The main content area is titled 'Admin: DriverIDs' and includes a subtitle 'Physical devices that associates a driver with a vehicle, i.e. key fob, Button, Bluetooth fob, RFID, etc.'. There are tabs for 'Assigned' and 'Unassigned'. The 'Assigned' tab is active, showing a table of 'Assigned drivers - 29'. The table has columns for 'DriverID/Driver PIN', 'Driver (RefID)', 'Times used this week', and 'Actions'. Each row contains a DriverID/Driver PIN, a Driver (RefID), a value of 0 for 'Times used this week', and an 'Unassign' button. A search bar and an 'Assign DriverID' button are located at the top right of the table. At the bottom right, there is a pagination control showing 'Total 29 items' and page numbers 1, 2, 3.

DriverID/Driver PIN	Driver (RefID)	Times used this week	Actions
2566278155	2566278155	0	Unassign
2566278567	2566278567	0	Unassign
322549035	322549035	0	Unassign
322991209	322991209	0	Unassign
322814378	322814378	0	Unassign
322815412	927	0	Unassign
322875525		0	Unassign
322878759		0	Unassign
322731881	8036	0	Unassign
322731901	8022	0	Unassign

Note. This new tab is available to customers with DriverID devices (e.g., fobs, RFID, etc.) linked to their account.

What is Launching?

Admin: DriverID displays all assigned DriverIDs, their associated drivers, and recent usage with the options to unassign or assign IDs in the Assigned tab. A dedicated Unassigned tab also makes it easy to view unassigned IDs, assign IDs.

Benefits

- **Improved Visibility and Tracking:** Users can easily see all assigned DriverIDs, who they're assigned to, and their recent usage, helping with better oversight and decision-making.
- **Efficient Resource Management:** The ability to track usage over the last week ensures that underutilized DriverIDs can be identified and reassigned more effectively.
- **Simplified DriverID Reassignment:** Quick unassign and assign options streamline the process, reducing time spent on administrative tasks.
