New Maintenance Updates

We are excited to announce the launch of several updates to Maintenance features in the Fleet Tracking Portal. Users can now manage and track their maintenance service tasks more effectively.

What is Launching?

The following maintenance updates are now available in the Fleet Tracking Portal:

Maintenance Page

- You can now create a new completed service log (independent from a Service Reminder)
- Notes will now be included in the CSV file download of the maintenance table

Map Page

- You can now view/edit upcoming & completed service tasks from the vehicle drawer on the map

Reports

- You now have access to a new 'Service Reminders & History' report

Benefits

With these updates, we have now fully integrated our new Maintenance service into all areas of the Portal allowing you to track and manage your vehicle maintenance efficiently and effectively.
