

New PNP-3300 Device

What is Launching?

The PNP-3300 is a light-duty plug-and-play device offering flexible installation.

Note. Driver ID and Remote Panic functionality are available through the use of the BLE Keyfob.

Benefits

The PNP-3300 is the CAT-M1 variant of the PNP-series devices, introducing minor improvements:

- **Decreased Power Consumption:** CAT M1 uses less power than CAT 1, making it better suited for battery-powered devices.
- **Decreased Design Complexity:** CAT M1 simplifies device design for future feature/functionality improvements.
