Smarter Reports, Same Familiar Portal

□ What's Launching?

We're continuing to make improvements to our reporting platform that bring you more powerful analytics while keeping the Portal experience you already know and use every day.

The reports listed below will now be generated and delivered using enhanced data capabilities — with no changes to how you run or schedule them.

Updated Reports Included in this Launch:

- Activity Detail Report (Driver-centric & Vehicle-centric)
 - **New** – Ability to select Driver Group or Vehicle Group as the Data Source
- Performance Report
- Begin/End of Day Report (Driver-centric & Vehicle-centric)
- Odometer History Report (Detail/Summary)
- **NEW** – VIN Reported as Diagnostic Report

We're also beginning the transition away from our legacy reports as improved new versions take their place. Legacy reports will be clearly marked with a deprecation countdown and a direct link to the updated version, so you always know what's changing and when. Scheduled report emails will also reflect these updates.

Legacy Reports Transitioning to End of Life:

- Activity Detail Report
- Performance Report
- Begin/End of Day Report
- Fleet Utilization Report
- Diagnostic Report
- Driving Violations Detail
- Driving Violation Summary

The current planned retirement date for these reports is July 3, 2026. We'll keep you informed as that date approaches.

□ Benefits

- **Your scheduling workflow stays the same** — You'll continue scheduling reports exactly as you do today through the Portal. No retraining, no new tools, no disruption to your team's routine.
 - **More powerful reporting behind the scenes** — New, improved reports bring enhanced data visualization and analysis to the reports you already rely on, giving you deeper insight without any extra effort on your end.
 - **A clear, transparent transition** — Legacy reports won't just disappear. You'll see deprecation timelines upfront, with direct links to the updated versions so your team can migrate at a comfortable pace.
 - **Better data, delivered your way** — Your automated report delivery continues uninterrupted while gaining the accuracy and performance improvements that come with the improved reporting engine.
