

Is an Outdated Browser Holding You Back?

Link: <https://help.gpsinsight.com/troubleshooting/is-an-outdated-browser-holding-you-back/> Last Updated: November 15th, 2019

Make Sure You're Not Missing Any Features

If you're using Internet Explorer version 10 or older, this is a great time to update your browser so you can get more from your GPS Insight solution. Microsoft has not supported these older browsers since 2016, which means you may be missing out on certain features and an overall better experience.

For the results you've come to expect from GPS Insight, we encourage you to use the latest versions of browsers such as Microsoft Edge, Google Chrome, or Mozilla Firefox. Our solution is optimized for Chrome, which will deliver the best user experience.

Using these supported browsers will ensure that your existing solution will continue to work as it has; there will be no impacts to your current product experience or workflow.
