ST-600 Specifications

RECHARGEABLE BATTERY

This appendix describes the product specifications of the rechargeable Li-polymer battery used with the ST-600.

Rechargeable Battery Characteristics

Item	Spec	Remark
Nominal Capacity	2700mAh@ 0.2 C5A Discharge	Nominal capacity refers to the capacity of 0.2C5A discharge with 3.0V cut-off voltage, application cut-off voltage at 3.5V.
Cycle Life	~500 Times	One cycle refer to one charge period and then one discharge period.
Standard Charge	0.2C5A	0.2C5A CC (constant current) charge to Max Charge voltage 4.2V, then CV (constant voltage 4.2V) charge current decline to $\leq 0.01C$.
Standard Discharge	0.2C5A	0.2C5A CC (constant current) discharge to discharge cut-off
Operating Temperature	Charge*: 0°C~ +45°C Discharge**: -20°C~ + 60°C	
Over Charge/Discharge Protection		The battery pack has protective circuit module to prevent over-charge/discharge for safety purposes.

Notes

* Recharging circuit has charge-protection above 45°C for safety compliance and recharge current declines when below freezing point.

** Based on bench test /field test data and device has performed outside specifications up to -35°C without reducing operating performance.

Rechargeable Battery Performance

Item	Spec	Remark
Number of Messages	1500	From Max charge 4.2V to 3.5V app cut-off voltage
Charge Time	60hrs	Uninterrupted bright sunlight from fully drained to be fully charged 4.2V
